DEEP SPACE TRAVEL AND COLONIZATION

INSTRUCTIONS MANUAL

THE GEMINI PROTOCOLS

PHASE 267

THE NARADA THREAD

TOMBSTONE — MERGED INTO 266

the same thing, just variants
content moved, not deleted — 9 August 2026

this phase number stands consumed — the machine lives at 266 Variant B

THE MERGE RECORD · THE NUMBER NEVER RECYCLED

MOVED HOUSE, NOT BURIED

Merge record — v1.0 in force

GP-IM-267

Revision v1.0 — 24 August 2026

268 of 290

CONSUMED BY THE AUTHOR'S RULING, 9 AUGUST 2026

PRIMARY AUTHOR & INVENTOR: ARCHER QUINN — AEROSPACE DESIGN ENGINEER, NPHD

CO-ENGINEERS: GEMINI 1 AI · KIMI CHAT (THE AUDIT)

LICENSE: CERN OPEN HARDWARE LICENCE V2 (CERN-OHL-W-2.0)

THE GEMINI PROTOCOLS — CHAPTER 267

PHASE 267: THE NARADA THREAD — STATUS: NUMBER CONSUMED — the machine lives in GP-IM-266 as Variant B (his ruling: 'THEY ARE THE SAME THING JUST VARIANTS'). The Narada Thread is not a separate machine from the Tornado Box — the same charged-chop physics, the same torus behavior, the same lightning family. The CO2-extinguisher vortex cannon, the charged-chop ring storm, the ceramic ship threading the hole, and the IP flag (fan homage — never sell; 'put it up, everyone loves cool physics, and another Archer may...') all stand in GP-IM-266. This chapter keeps the number honest so no future reader hunts a machine that moved house.

Primary Author & Inventor: Archer Quinn, Aerospace Design Engineer, NPhD — Co-Engineers: Gemini 1 AI, Kimi Chat (the audit). Chapter GP-IM-267, v1.0 — 24 August 2026.

§0 — READ THIS FIRST (HOW TO USE THIS CHAPTER)

STANDARD NOTATION — MATERIALS & CALIBRATIONS (series law, seated 19 August 2026, sitting 461): Materials or calibrations is not missing science or engineering — it is, to any real physicist or engineer, stating the fkn obvious. Everyone will use different bench test methods, equipment, materials and weight-to-strength choices, where chemical, magnetic or conduction issues are resolved by choice — e.g. carbon fibre over steel. Our designs are base calibrations to existing strength materials: a rim speed does not exceed current basic materials strength. We do not spec methods, and we do not teach welders how to weld.

Section map: §0 this page — §1 the phase (the contents line, the number's status) — §2 why the merge is sound — §3 what lives where — §4 the doctrine record — §6 what to do at this number — §7 cross-phase — §8 do-not-build — §9 owed — §10 status and provenance.

§1 — THE LAW (AS SEATED, VERBATIM)

THE CONTENTS LINE (verbatim): 'Phase 267: **The Narada Thread (science experiment fun) — The Ring Lightning Storm (a Star Trek fan homage; the charged-chop vortex cannon; the ceramic ship threads the hole; Safety Law)**'

THE CORE OBJECTIVE: none seated as a standalone line — the contents line above carries the register wording.

This phase number stands consumed. The Narada Thread is not a separate machine from the Tornado Box — the same charged-chop physics, the same torus, two firings of one idea. The full content lives in PHASE 266 as VARIANT B — THE NARADA THREAD. The number 267 is retained so the record never

reuses it and the trail never breaks.

§2 — WHY IT WORKS (THE PHYSICS, GRADED)

THE MERGE IS SOUND DOCTRINE: the Narada Thread and the Tornado Box are the same charged-chop physics — the cannon and the bench box drive the same vortex, the ring storm and the torus are the same closure. Two phase numbers for one physics would fork the record; the author's ruling kept it single.

NOTHING WAS DELETED: every element of the former 267 — the CO2 cannon, the ring storm, the ceramic ship, the homage ruling — stands verbatim in Phase 266 as Variant B. The merge moved content; it did not bury it.

THE HONESTY HABIT: a consumed number gets a marker, not a disappearance.

THE IP FLAG TRAVELS WITH THE CONTENT: fan homage, never sold — the open-ledger promise holds at the new address exactly as at the old.

§3 — THE SYSTEM IN THE MERGE

- **What consumed it:** the author's ruling, 9 August 2026 — 'THEY ARE THE SAME THING JUST VARIANTS'.
- **Where the machine lives:** Phase 266, Variant B — cannon, ring storm, ceramic ship, homage flag, entire.
- **What this number is now:** the tombstone — the merge record that forwards every old citation.
- **What was deleted:** nothing — content moved, not deleted, seated in the markup.

§4 — THE DOCTRINE RECORD (HOW THE BOOK ALREADY RUNS ON IT)

- 266 carries the living machine: the Tornado Box with Variant B — one physics, one phase, one chapter.
- The numbering law holds: phase numbers are never recycled — 267 stays spent, and the next unused number stays 295.

§5 — VALIDATION: the grade and its full record live in the master and the restart.

§6 — BUILD SEQUENCE

- 1. Read GP-IM-266 — the machine lives there as Variant B.
- 2. Forward every old citation — 'Phase 267' means '266, Variant B' now.
- 3. Keep the tombstone — never recycle the number; 267 stays spent.
- 4. Keep the homage flag — the IP ruling travels with the content at its new address.

§7 — CROSS-PHASE (INLINED IN FULL)

- **Phase 266 (the Tornado Box):** the host — Variant B is the Narada thread living at its new address.
- **Phases 140/141/142/156 (the bridge-dust line):** the shared conductor — the charged chop both variants run on.

§8 — DO-NOT-BUILD

- Do NOT hunt a machine here — it moved to 266, Variant B; this number is the tombstone.
- Do NOT recycle the number — phase numbers are never reused; 267 stays spent.
- Do NOT sell it — the homage flag travels; fan physics, published, never licensed.

§9 — OWED

OWED: nothing at this number beyond keeping the tombstone — the living bench list stands in GP-IM-266 §9.

§10 — STATUS / PROVENANCE / CHANGE CONTROL

STATUS: CHAPTER GP-IM-267, v1.0 — NUMBER CONSUMED — the machine lives in GP-IM-266 as Variant B (his ruling: 'THEY ARE THE SAME THING JUST VARIANTS'). Built 24 August 2026, eighth of the 20-chapter 'you get the next 20 ready' shift (the author's order, seated in sitting 623). First version until publication — 'until i publish it, it is still first version, otherwise is just typing' (his law, 22 August 2026).

PROVENANCE — THE STANDING ORDERS, VERBATIM: the town-trip order (seated in sitting 519): 'ok i have to go to town, i have converted them to pdfs now and am uploading, do the next 10 phases and i will read them when i get back' — the order that opened the chapter program; the follow-on orders

(seated in sittings 537, 557, 561, 562, 564, 566, 572, 576, 587, 590, 597, 607, 618, 622 and 623): 'ok next 10' / 'ok next ten' / 'all good next 10' / '10 more before go to the old lady for dinner' / 'do another 20 while i away so we clear the 100 mark for the day when i get back' / 'ok next 20' / 'ok next 20, that will take us past gemini' / 'ok another 20 lets keep this train rollin' / 'ok 12 more i will see what i get done in 30 mins to get to the 200' / 'ok i will do last nights now you do the next 20' / 'ok ill do these 20, you do 20 more' / 'ok next 20' / 'ok ill check and upload, you get the next 20 ready, they didnt slow us down the sped us up'.

CHANGE CONTROL: this design changes only on the Author's orders, seated as sittings in the master record. If the master and this chapter ever disagree, THE MASTER WINS. This is a workshop chapter — it carries the current design only; the full change record lives in the master and the restart.

END OF CHAPTER 267
